PROJECTS

On that day | <https://github.com/cristianmitu/ProjectOne>
<https://cristianmitu.github.io/ProjectOne>

- When a user selects a specific day from the calendar, a movie that was released on that day, plus three notable events that occurred on the same day are displayed on the screen.
- My responsibility in this project was to retrieve the notable events information from the Wikimedia Application Programming Interface (API).
- Technologies used: Flexbox, bootstrap, two server application programming interfaces (The Movie Database and Wikimedia APIs).

Actors and Movies | <https://github.com/cristianmitu/Project-two>
<https://main--amazing-fudge-d0f2d4.netlify.app>

- This is a web application that allows users to browse information about actors and movies.
- I contributed in coming up with the idea for the project.
- Technologies used: HTML, CSS, Javascript, React, Bootstrap, Axios, Node, React-router-dom, get & post requests to an API.
